

SAKSHI AGRAHARI

Product Designer · UI/UX Designer · Design Engineer · AI-Native Technologist

Delhi, India · SakshiAgrahari2004@gmail.com · [Portfolio](#) · [LinkedIn](#) · [GitHub](#) · [Behance](#) · [UI/UX Portfolio](#)

AI-native product designer and design engineer with full-stack delivery capability from user research and Figma prototypes through to shipped React/TypeScript code. Won **1st place at a national UX Solvathon among 700+ participants**. Designed and shipped SaaS interfaces across B2B and B2C products (US, UK, India). Portfolio spans AI-powered platforms, voice interaction systems, legal intelligence tools, and gamified fintech — all with measurable outcomes. Holds a **Columbia University Prompt Engineering certification** and is proficient in live AI workflows using Claude, GPT-4, Gemini, and DeepSeek. Graduating **June 2026**.

EXPERIENCE

Coding & Design Instructor *Feb 2026 – Present*

BrightChamps · EdTech · Remote, United States

- ▶ Teach **Generative AI, Roblox game development, coding fundamentals, and UI/UX design** to students globally across live and recorded sessions.
- ▶ Design and deliver structured, age-appropriate curriculum; maintain **95%+ student satisfaction** scores across cohorts.
- ▶ Translate complex technical concepts (LLMs, prompt engineering, design systems) into engaging, accessible lessons for K-12 learners.
- ▶ Active instructor across **100+ students**, building confidence in AI-native workflows and creative technology.

Product Designer & Website Developer *Oct 2025 – Feb 2026*

OpenSphere (B2C) · LegalBridge (B2B SaaS) — Sister Companies · Remote, San Francisco Bay Area

- ▶ Covered dual design scope for B2C (OpenSphere) and B2B SaaS (LegalBridge), defining **user flows, complex workflows**, and product strategy across both segments.
- ▶ Led the design process from user research and wireframes to **high-fidelity visual design in Figma**, ensuring zero-handoff ambiguity with engineering.
- ▶ Built and governed a **shared design system (Shadcn UI + Tailwind CSS)** adopted across 3 product teams. Performed front-end coding for a LegalBridge project (lawyer directory) using **React/TypeScript**.
- ▶ Drove creative/visual content for LegalBridge, including **editorial and design work for the exclusive digital magazine**.
- ▶ Ensured all shipped interfaces were **WCAG 2.1 AA compliant**, mobile-first, and validated with real users before release.

UI/UX Designer *May 2025 – Oct 2025*

Cubble · Remote, Edinburgh, UK

- ▶ Delivered end-to-end Figma-to-production design flows for **3 product features**; A/B testing confirmed 2 of 3 outperformed control on task completion rate.
- ▶ Reduced **design review cycles by ~40%** by co-locating with engineering during sprint cycles — identified as the most efficient handoff process across the product team.
- ▶ Produced user journey maps, annotated design specs, and interactive prototypes; engineering described these as **"the clearest handoffs they'd received."**

Freelance Web & UI/UX Designer *Jun 2024 – Present*

Self-Employed · Remote · Global clients

- ▶ Designed and shipped **10+ client-facing websites** — all mobile-first, WCAG-audited, and deployed on Vercel with 99.9% uptime.
- ▶ Delivered full brand identities and scalable design systems within **2-week sprint cycles; 100% client retention** with 3 clients extending into ongoing retainer relationships.
- ▶ Scope spans brand design, UI systems, UX flows, and frontend implementation — full-cycle ownership from brief to deployment.

PROJECTS

Vidya — AI-Powered Accessible Learning Platform [GitHub](#) · [Live](#) · *React · TypeScript · OpenAI Vision · GPT-4 · Whisper · Gemini*

- ▶ **Designed and shipped a multi-model AI platform** making textbooks accessible for students with visual impairments — orchestrating OpenAI Vision, GPT-4, Whisper, and Gemini in a single cohesive UX.
- ▶ Achieved **95% accuracy in AI content extraction** across 300+ test pages; designed trust patterns (confidence indicators, verification flows, fallback states) that ensured reliability in a high-stakes educational context.
- ▶ Information architecture restructures complex textbook content into adaptive, multi-modal formats — serving a target population of **50+ students with disabilities** in India.

Decision-First Legal Intelligence — AI Contract Review System [Read Case Study](#) · *Product Design Research · AI UX · UX Case Study*

- ▶ Led product design research for an AI-powered contract review platform targeting in-house legal teams — mapped workflow bottlenecks, decision friction, and cognitive load patterns across 40–100 page agreements.
- ▶ Designed a **3-mode progressive disclosure system** (Overview → Review → Deep Dive) with a 60/40 document–AI panel split, risk heatmap sidebar, and clause-level actions (Approve / Flag / Reject), reducing estimated review time from 2–3 hours to under 10 minutes.
- ▶ Defined **AI trust architecture**: character-level citations, per-section confidence scoring, Comparison Intelligence (contract vs. company standard vs. industry benchmark), and a Negotiation Point Generator — translating raw analysis into actionable decisions.

Pocket Fund — AI-Powered Personal Finance App [GitHub](#) · [Live](#) · *React · TypeScript · DeepSeek LLM · OpenRouter*

- ▶ Designed a behavior-driven fintech experience reframing budgeting as a **gamified goal system** — addressing impulse spending and low financial literacy in young adults.
- ▶ Shipped gamified product systems (The Fight, The Locker, story-based quests) driving **3× user engagement increase and 60% retention rate** — 2.5× the fintech industry average.
- ▶ Built DeepSeek LLM-powered AI coach delivering personalised financial advice; designed information hierarchy surfacing spending patterns at a glance, reducing dashboard cognitive overload.

VoXa — Voice-Driven Task Manager [GitHub](#) · [Live](#) · *React · TypeScript · Web Speech API*

- ▶ **Designed a voice-first interaction system from scratch**: real-time visual feedback states, confirmation dialogs, graceful error recovery, and empty states — none of which had keyboard or click equivalents.
- ▶ Prototyped the animated voice-listening indicator in Figma, tested timing variants with real users, then spec'd the final animation curve for engineering; shipped **pixel-perfect coded website live**.
- ▶ Created analytics dashboard visual hierarchy — defined metric surfacing, chose chart types by data shape, and set content density rules to prevent information overload.

Wellness Tracker — End-to-End UX Case Study [Behance](#) · [Figma Prototype](#) · [Figma](#) · [Framer Motion](#) · [Tailwind CSS](#)

- ▶ Full UX ownership: competitive analysis → user interviews → 3 personas → journey mapping → wireframes → high-fidelity UI with light/dark mode. Persona insights restructured IA — **simplified onboarding from 7 steps to 3** and repositioned the primary CTA.
- ▶ Crafted calming visual language (muted palette, generous whitespace, Framer Motion micro-transitions); **prototype satisfaction scores rose +30%** in moderated usability tests.
- ▶ Published **full Behance case study** documenting problem framing, design rationale, iteration history, and WCAG compliance audit.

Gmail Redesign — File Discovery Case Study [Figma Prototype](#) · [Figma](#)

- ▶ Identified a genuine usability gap (no native file management in Gmail); ran heuristic evaluation against **5 competing email clients** — surfaced file retrieval as highest-frequency pain point with no existing solution.
- ▶ Designed contextual Files & Attachments side panel with multi-axis filtering (type · date · size · A–Z); prototype walkthroughs showed **~60% faster file retrieval** vs baseline scroll-and-search.
- ▶ Delivered full Figma handoff: annotated high-fidelity screens, component spec sheet, interaction notes, and edge case coverage — **zero engineering ambiguity**.

Yonder Wonder — AI Photo Merge App [Figma Prototype](#) · [Figma](#)

- ▶ Mapped the emotional journey before touching Figma: identified upload anxiety and AI output uncertainty as the two moments where users would abandon — then designed directly against them.
- ▶ Distilled a complex generative AI flow into a 3-step interaction pattern (upload → prompt → preview) with guided suggestions; makes AI feel intuitive for non-technical users.
- ▶ Designed progressive disclosure for the AI generation state — skeleton screens, animated progress indicators, and a preview reveal interaction that builds anticipation rather than frustration.

SKILLS

DESIGN & RESEARCH

Figma · Adobe XD · Framer · Sketch · Procreate · WebFlow · Adobe Creative Suite
User Research · Usability Testing · A/B Testing · Heuristic Evaluation · User Experience Design
Personas · Journey Mapping · User Story Mapping · JTBD
Design Systems · Atomic Design · Design Tokens · Storybook
WCAG 2.1 · Accessibility Audits · Inclusive Design · HCI
Wireframing · Prototyping · Microinteractions · Motion Design ·

ENGINEERING & AI

React · TypeScript · Next.js · Tailwind CSS · Framer Motion
Shadcn UI · HTML5 · CSS3 · Node.js · Git & GitHub
OpenAI API (GPT-4 · Vision · Whisper) · Gemini · DeepSeek · Claude
Prompt Engineering · RAG Architecture · LLM Integration
Claude Code · Cursor · v0 · Bolt · Figma Make · Wispr Flow
Agile/Scrum · Figma Dev Mode · Notion · Miro · JIRA

EDUCATION

B.Tech, Computer Science & Engineering

2022 – May

2026

Dr. A.P.J Abdul Kalam Technical University, Lucknow

Core CS foundation (DSA, Networks, AI, OOP, Software Engineering) bridges design intent with engineering implementation.

High School Science Stream with Computer Science

2018 – July 2022

School of Excellence, Delhi · 96/100 in CS · Top 80 of 800 students

Top 10% Ranked top 80 of 800 students in competitive entrance exam & in 12th got 96/100 in Computer Science.

ACHIEVEMENTS & RECOGNITION

- ▶ **UI/UX Solvathon — 1st Place** Won among 700+ participants; complete user-centred solution including research, workflows, and high-fidelity UI for a real-world brief.
- ▶ **SheFi Global Scholar (Cohort 14) — Full Scholarship** One of a select worldwide cohort awarded a full scholarship for SheFi's Blockchain, DeFi & Web3 programme, USA.
- ▶ **Aspire Leadership Programme (Harvard-founded) — Cohort V** Exclusively invited to the inaugural ***AI-Integrated Leadership Program*** for top-performing scholars demonstrating leadership and social impact potential.
- ▶ **Global Mentorship Initiative** Mentored by a UK/Australia-based Scientist with experience across 8+ countries; structured guidance on research, professionalism, and academic pathways.
- ▶ **TechFest — 3rd Place** Built an AI-driven culinary website for personalised recipe suggestions; judged on UX quality and technical execution.
- ▶ **24-Hour Hackathon — 2nd Runner-Up** Designed and shipped a full-stack solution within a 24-hour constraint.
- ▶ **Dell Coding Workshop** Recognised for outstanding coding skills; received formal certification.
- ▶ **School of Excellence — Top 10%** Ranked top 80 of 800 students in competitive entrance exam.

CERTIFICATIONS

- ▶ **Columbia University** — Prompt Engineering & Programming with OpenAI
- ▶ **IBM** — Enterprise Design Thinking Practitioner
- ▶ **Adobe** — InDesign 2025 Professional Certificate
- ▶ **Google Cloud** — Real-World AI Applications with Gemini & Imagen
- ▶ **Microsoft Azure** — Azure AI Fundamentals
- ▶ **LinkedIn** — UX Interaction Design
- ▶ **LinkedIn** — Universal Principles of Design
